Providing Services (overseas)

【Building works】

Fujita offers design and construction services for its clients who expand their business overseas, including manufacturing facilities, hotels, high-rise condominiums, logistics facilities, school buildings, and hospital buildings. It provides the optimal solution for clients' challenges utilizing its long track record of experience and achievements.

【Civil Engineering works】

In the infrastructure field, Fujita has many proven experiences and a long track record, especially as ODA (official development assistance) projects such as constructing railways, airports, roads and bridges etc. It aims to manage its business all over the world continuously.

【Overseas Development】

Fujita is proactively engaged in overseas real estate developments as one of our main overseas businesses based upon its abundant proven track records overseas and our know-how on urban redevelopment with domestic projects.
