Providing Services

CHODAI CO., LTD., is an Infrastructure Engineering Consulting Company whose holding company is the "People, Dreams & Technologies Group Co., Ltd.". CHODAI began designing the Honshu-Shikoku connecting bridges include "Akashi Kaikyo Bridge" in 1970, and has expanded its work from the road transportation field in Japan to urban and regional planning, rivers, railways, public facilities, PPP, ITS, TOD, etc.

We have been involved in overseas infrastructure projects since 1984, providing transportation master plans, feasibility studies, detailed designs, bidding / tender assistance, construction supervision and maintenance technology transfer. We have overseas offices (6 countries) and overseas subsidiaries (8 companies). In recent years, in addition to overseas long span bridge and railway projects, we have been developing renewable energy projects through PPP as regional development projects, and are participating in business planning and design, SPC financing, investment and equipment procurement, and operational management services.

Optimization of public transportation functions

Innovator of advanced transportation

Project Achievement / Technical Expertise

The Java North Line Upgrading Project (Indonesia, JICA-ODA, 2019) The project is to upgrade the Java North Line (L=714 km), which connects the capital Jakarta and Surabaya.

Water Supply Project

(Philippines, PPP, 2015)
This project is to provide water supply to Butuan city for a 25-year concession period. CHODAI makes capital participation in SPC.

Nhat Tan Bridge Project (Vietnam, JICA-ODA, 2016)
This bridge connects the capital Hanoi and Noi Bai Airport, strengthening the capital's functions and shortening travel time.
